Citizenship: Canadian

Languages: French (native), English
(perfect), notions in a few others

I N B R I E F

I have worked in the field of information technology since 1994, first as Technology Advisor and later as Product Manager, Director of Globalization and Director of Technology. I was instrumental in launching, designing, specifying and implementing the *Tango* Web Browser from Alis Technologies, which won high praise for its great multilingual capabilities.

Later, I coordinated the implementation of a line of internationalization software products, which became the basis for a globalization group. To grow this group, I then developed an internationalization consulting and localization activity. After the acquisition of a translation company by Alis, I became director responsible for the internationalization products and for the technology infrastructure of Alis' Globalization unit. Over these years, I performed very diverse activities, from programming to managing a team through technology watch, standardization, software design and architecture, public relations, sales support, project management, product management, marketing activities and recruiting.

I am active in standardization (W3C, ISO, IETF), especially Web-related, as the editor or author of four Internet RFCs and as co-editor of the W3C's XML 1.0 and

XML 1.1 specifications and of the *Character Model for the World Wide Web*.

I have fulfilled a number of speaking engagements around the world, have been a member of the Advisory Committee of the World Wide Web Consortium (W3C), sit on two of its working groups (Internationalization and XML Core) and am a member of the Board of Directors of the Centre international pour le développement de l'inforoute en français (CIDIF) and of the Conference Board of the International Unicode Conference series.

Before 1994 I worked in the academic world as Research Associate and Thesis Director in the fields of optics and photonics. I performed published research under both personal and team grants and led a research team. It is as an academic that I started publishing an Internet FAQ on the use of accented characters in Usenet, one of the first efforts at breaking the language barrier on the Internet. I hold B.Sc. and Ph.D. degrees from Université Laval in Québec City.

E D U C A T I O N

University

- Ph.D. in physics, Université Laval, 1985.
- B.Sc. in physics, Université Laval, 1981.

College

- D.E.C. in sciences, Campus Notre-Dame-de-Foy, Cap-Rouge, 1978.
-

P R O F E S S I O N A L E X P E R I E N C E

Alis Technologies Inc. (since 1994)

Various roles, from Technology Advisor to Director, Globalization (2000)

Roles and accomplishments:

- Responsible for technology infrastructure of the Globalization Group.
- Overall responsibility for Alis' Globalization activities, including software and Web localization, internationalization products and consulting.
- Manager of the development team of the line of internationalization products (Batam, Florès, ¿Qué ?, Réacc, UniTri)
- Responsible for technical specifications and for commercialization of the line of internationalization products
- Responsible for part of the requirements definition, analysis and architecture of GPHIN II, a system offering multilingual early warning information pertaining to public health issues.
- Responsible for requirements definition, analysis, design and part of the implementation of HTS, a web-based order-taking application connected to the Ariba e-procurement platform.
- Responsible for business partnerships for Alis Translation Solutions
- Customer relations, pre-sales support
- Internet and internationalization consulting mandates (Kodak, Bombardier, TradeCompass, DMR, Positron,...) ; author of two research reports on language processing in information technology commissioned by Francophonie agencies
- Internal consultant for specification and technical quality of products, in particular Tango and Batam
- Development of linguistic modules for Batam and Tango, of development and localization tools, of Web applications
- Technology watch and standards activities, in particular internationalization of HTML and other Internet technologies; published four Internet *RFCs*; member of two W3C (World Wide Web Consortium) working groups, Internationalization and XML-Core. Co-editor of the W3C's *Character Model for the World Wide Web*; of XML 1.0 (3rd ed.) and of XML 1.1.

Curriculum Vitæ – François Yergeau

- Web Development (notably babel.alis.com)
- Technical and commercial writing
- Evangelization and public relations; numerous participations in conferences and seminars; published various papers

Université Laval (1986 to 1994)

Research Associate and Thesis Director

Roles and accomplishments:

- Management of a subsidized research team
- Founding member of the Centre d'optique, photonique et laser (COPL)
- Fundamental research in integrated optics, non-linear optics and atomic physics
- Numerous scientific papers, participation in national and international conferences

National Research Council of Canada (6 months in 1988-1989)

Visiting Scientist

Centre d'Études Nucléaires de Saclay, France (1985 to 1986)

Post-doctoral Scientist

References provided on request.

I N F O R M A T I O N T E C H N O L O G I E S C O M P E T E N C I E S

- Expert in software and Internet internationalization and in XML
 - Mastery of Unicode, HTML, CSS, XML, XSL, SGML, various Web technologies
 - Knowledge of relational databases (SQL), of enterprise application architecture (notably J2EE), of UML
 - Experience in conceptualization, architecture and design of applications, in project and product management
 - Knowledge of numerous Internet protocols (HTTP, SMTP, URL, MIME, SOAP)
 - Mastery of the Unix, DOS and Windows operating systems. Notions of RT-11, VMS and VM/CMS.
 - Knowledge, at various levels of proficiency, of the Java, C, C++, Perl, Shell, JavaScript, Delphi, Pascal, Fortran, APL, Basic and x86 Assembly programming languages
 - Mastery of various aspects of numerical analysis. Notions in algorithmics
-

E X T E R N A L M E M B E R S H I P S

- Member of the XML Core and Internationalization (i18n) Working Groups of the W3C
- Member of the Board of Directors of CIDIF (Centre international pour le développement de l'inforoute en français)
- Member of the Conference Board of the International Unicode Conference series
- Member of the Canadian Advisory Committee of ISO JTC1/SC2
